10. Technical support/repairs
11. Damaged/lost/stolen devices
12. Parent/Guardian expectations
13. Student owned devices/BYOD
14. Rights and ownership information

Background Information

The focus of providing Chromebooks in the Appleton Area School District is to provide current tools and resources to today's learner. Effective learning and excellence in education requires that technology be seamlessly integrated throughout the educational program. Increasing student access to technology is essential and one of the current learning tools available is the Chromebook. Individual use of Chromebooks supports student empowerment to engage in their personalized learning before, during and after school as they prepare for postsecondary education and the modern workplace. Research¹ indicates that students who use devices in a one-to-one (1:1) education environment are more organized and engaged learners, attend school more regularly, advance their knowledge and understanding of technology, and take an increased ownership in their personal learning. Chromebooks have the ability to make learning more engaging, accessible, and personal.

Student learning results from continuous interaction with educators, students, parent/guardians, and the extended community. Technology immersion does not diminish the vital role of the teacher but transforms the teacher from the director of learning to a facilitator of learning. Effective teaching and learning with Chromebooks integrates technology into the curriculum anytime, anyplace.

1. Introduction

Beginning in September, all Appleton Area School District (AASD) secondary students will be issued a Chromebook for instructional use during the school year. This is an exciting opportunity for our secondary students to have access to digital learning resources both during the school day and outside of the school day. The purpose of this Chromebook Handbook is to provide the guidelines for the proper use and care of the investment made by the AASD and the Appleton community in providing each secondary student the use of a Chromebook during the school year. The AASD reserves the right to revoke or modify this handbook and/or its policies and procedures at any time.

2. Hardware and software issued

Students will be issued the following:

- 1) Chromebook managed by District Google Chrome Management License that allows the District to support applications and provide oversight.
- 2) (1) Power cord
- 3) (1) Protective Chromebook Case

3. Care of Chromebook

Basic care

- Be mindful of food, drink, etc. that may come in contact with the Chromebook.
- Cords, cables, and removable storage devices must be inserted and removed carefully into the Chromebook.
- Students should never carry their Chromebook by the screen.
- Chromebooks should be closed or shut down when not in use to conserve battery life.
- Chromebooks should never be forced into a tight space in a locker or wedged into a book bag as this may damage the screen.
- Do not expose your Chromebook to extreme temperature or direct sunlight for extended periods of time. Extreme cold or heat may cause damage to the device.
- Always bring your Chromebook to room temperature before turning it on.

Screen Care

- The Chromebook screens can easily be damaged, particularly by excessive pressure.
- Actions that tend to damage the screen:
 - Placing anything near the Chromebook that could put pressure on the screen.
 - Placing anything (e.g. headphones, pens, pencils, flash drives, etc.) in the carrying case that will press against the cover.
 - Poking the screen.
 - Placing anything on the keyboard before closing the lid (e.g. headphones, pens, pencils, flash drives, etc.)
- Clean the screen with a soft, dry, anti-static or micro-fiber cloth. Do not use window cleaner or any type of liquid or water on the Chromebook. Individually moistened eyeglass lens cleaning tissues may also be used to clean the screen.

Chromebook Cases

District usage history clearly illustrates that Chromebook cases significantly reduce the likelihood of damage to the device. The District is providing cases that are custom fit to the Chromebook. Therefore, it is expected that students will at all times use and transport the Chromebook inside that case. Failure to do so may result in appropriate disciplinary or corrective action.

4. File/document management

Students access their Google Apps for Education account by logging in using their *@stu.aasd.k12.wi.us email account. When in school, Chromebooks will automatically connect to the AASD wireless network. When logged in, students are able to access his or her schoolwork from any computer that has Internet access. The AASD does not guarantee that the school network will be up and running 100% of the time. In the rare case that the network is down, the District will not be responsible for lost or missing data.

5. Email, Internet usage and filtering

Students are provided an email account by the school. Email correspondence is to be used for educational purposes only. Electronic communication coming from or going to the school-issued email account can and may be monitored to ensure that all terms of usage are being followed.

As required by the Children's Internet Protection Act (CIPA), an Internet filter is maintained by the district for school. When AASD Chromebooks are used on networks outside the District network (e.g. home, coffee shop, etc.), the same level of filtering will be maintained.

Filtering restricts access to inappropriate online materials as defined by the AASD Board Policy including, but not limited to pornography, obscenities or other material deemed harmful to minors. AASD cannot guarantee that access to all inappropriate online material will be blocked. *No filter is as reliable as adult supervision!* It is the responsibility of the parent or guardian to monitor student use, especially Internet, in the home. It is the responsibility of the user to appropriately use the device, network, and the Internet. All use, including off campus, is governed by [AASD Acceptable Use of Technology Policy 363](#).

Students are required to notify a teacher or administrator if they access information or messages that are inappropriate, dangerous, threatening, or that make them feel uncomfortable.

AASD is not responsible for providing internet access outside of school. The ability to access the internet from home varies from situation to situation. No guarantee is implied. A list of free Wi-Fi hotspots in the Appleton area may be found at the following site:

<http://www.openwifispots.com/FinderDirectoryCity.aspx?City=Appleton&State=WI>

6. Monitoring usage

AASD utilizes software to facilitate the monitoring of student Internet usage. While AASD is committed to protecting students, no technical or human supervision is failsafe. AASD reserves the right to investigate, review, monitor, and restrict information stored and transmitted on district owned devices. Attempts by students to bypass the monitoring and filtering systems in place by resetting the device or attempting to install or use proxy servers or any other measures will be dealt with via the disciplinary process and may result in loss of student use of the device or other measures deemed appropriate by AASD administration up to and including expulsion.

7. Student responsibilities

AT SCHOOL

The Chromebook is intended for daily instructional use. Students are responsible to bring their Chromebook to all classes, unless specifically advised not to do so by their teacher. When instructed not to bring a chromebook to class, devices are to be securely and properly stored in the student's assigned locker. If a student forgets their Chromebook, they will need to report to the school's Chromebook Helpdesk.

AT HOME

Students are encouraged to use their Chromebooks outside of the school day and at home for educational purposes. All students are responsible to maintain an appropriate (full) charge for the battery on a daily basis. Students are expected to charge their Chromebook at home when the battery is unable to support a day's use in school. There is no guarantee that charging resources will be available in school when a student may need it. Students are responsible for bringing their Chromebook to school each day.

SOUND

Speakers are to be muted at all times unless permission is obtained from the teacher for instructional purposes.

PRINTING

AASD encourages digital transfer of information by sharing educational information and emailing of information, assignments, other communication, etc. If a printed copy of a document is necessary, students may print from a District networked computer. Printing is available by accessing your Google Drive on a networked computer within the school building and printing. Chromebook printing is available based on a site decision.

PERSONALIZING the CHROMEBOOK/CASE

Chromebooks must remain free of any decorative writing, drawing, stickers, paint, tape, or labels that are not the property of the AASD. Students may add appropriate music, photos, and videos to their Google Drive. Personalization of cases is acceptable as long as it is removable.

Students are responsible for turning in clean cases when they return their Chromebooks. Personalized media are subject to inspection and must follow the AASD acceptable use policy.

PRIVACY AND SAFETY

Data storage is not guaranteed to be private or confidential. District Administration reserves the right to inspect files on District property at any time and will take the necessary steps if files are in violation of the [District's Technology Acceptable User Policy \(363\)](#).

Inadvertent access to a website that contains obscene, pornographic, or otherwise offensive material must be reported to a teacher or an administrator immediately so such sites can be blocked from further access. This is not merely a request. It is a responsibility.

LEGAL PROPRIETY

All students and staff must comply with trademark and copyright laws and all license agreements. Ignorance of the law is not immunity. If you are unsure, ask if you are in compliance with the law. The school librarian is a resource for questions on copyright.

Plagiarism is a violation of the AASD discipline code. Give credit to all sources used, whether quoted or summarized. This includes all forms of media on the Internet, such as graphics, movies, music, and text.

MANAGEMENT SOFTWARE

AASD has installed Google Chrome Management Software on all devices. Any attempts to bypass this software through any measures including resetting the device will result in disciplinary action by AASD.

8. Acceptable Use Chromebook Guidelines

GENERAL GUIDELINES

- [Acceptable use for Technology and Network Resources 363 \(522.7\)](#)
- Students are responsible for ethical and educational use of technology.
- Access to AASD technology is a privilege, not a right. Students are required to follow AASD policies and rules.

PRIVACY, SAFETY, AND DIGITAL CITIZENSHIP

- Teaching our students how to be productive, ethical, and successful digital citizens is a top priority. Digital Citizenship curriculum is provided to all students with the guide of [Common Sense Media](#).
- As required by the Children's Internet Protection Act (CIPA), Internet access is filtered in our school district. We have also purchased a filtering system that will filter the internet content when the devices are taken outside of the district and used on the public internet.
- Filtering restricts access to inappropriate content, but the AASD cannot guarantee that all inappropriate content will be blocked. No filter is as reliable as adult supervision. It is the responsibility of parents or guardians to help monitor a student's technology usage at home.

- AASD Data Use and Privacy Practices provide parents with useful information on what data is collected and why, how data is used to support student success, and how data and student privacy is protected.
- Students will report to staff or administration if online experiences ever become uncomfortable including but not limited to receiving harassing messages, accidentally viewing offensive or inappropriate content, or being asked to meet someone they met online without parental approval.
- Students will not use profanity or offensive media in any type of communications.

9. Consequences

Students are responsible to comply with Board policies and this handbook at all times. Consequences for non-compliance with Board policies and this handbook may include disciplinary actions and/or financial responsibilities. Failure to comply may reduce or revoke student privileges in the 1:1 Chromebook program. The student may also be subject to disciplinary action as set forth in the AASD Student Handbook. The AASD cooperates fully with local, state, and federal law enforcement in the investigation of all computer crimes.

Chromebooks are to be returned annually no later than the last day of the school year. Chromebooks must also be returned upon removal from the school through withdrawal, suspension, expulsion, or transfer.

The Chromebook remains the property of the AASD and cannot be loaned, sold, bartered, traded, leased, rented, or given to any other person(s). Failure to return the Chromebook and peripherals will result in a certified letter being sent to the parent or adult student listing the items not returned and associated replacement costs. The parent or adult student will have five (5) days to return the items or pay replacement costs. Failure to comply will result in a referral to local law enforcement. The parent or adult student may be charged with theft. The AASD reserves the right at any time to require the return of the Chromebook.

10. Technical support/repairs

Damaged or inoperable Chromebooks are to be returned to the library to be entered into the repair tracking system. For repairs taking more than one or two hours, a loaner may be provided to the student to use until the device is repaired and returned.

11. Damaged/lost/stolen devices

Chromebooks are assigned to students in a similar fashion as assigning textbooks. However, unlike textbook assignment, Chromebooks will be assigned to the student annually for the entirety of their enrollment in the District. It is understood that as materials are used, normal wear is expected. What is not expected is wear and tear that is above what is considered normal. As with textbooks, students may be issued a fine at the end of the school year if excessive wear is evident.

It is also understood that when using electronic devices, damage may occur. Two types of damage to school property are accidental damage and malicious or negligent damage. If a device is damaged, the student will need to return the device to the school's designated help

desk to generate a repair order and to determine the nature of the damage, accidental or malicious. If device damage is determined to be accidental, the student may be able to check out a loaner while the device is being repaired. The student may be charged for repeated repair. If a device is damaged through malice or negligence, the student will be responsible for all repair costs. In addition, students may face administrative or legal consequences depending on the nature of the damage. All determinations of malicious damage will be made by school administration.

If the device is lost or stolen, school administration must be immediately notified. Contact must also be made with the School Resource Officer (SRO) so an official police report is generated to report the lost or stolen device. Efforts will be made to find and return the device, but if unable to locate the device, the student may be responsible for the replacement cost of the device. The parent, guardian, or adult student may be responsible for compensating the district for any losses, costs, or damages which are not accidental in nature up to and including possibly the device's full replacement cost. Students with damaged, lost, or stolen devices who fail to notify school officials may be subject to disciplinary action.

Accidental Damage Claims

AASD Label or sticker removal \$5

Personal stickers on device \$5

Power cord replacement \$20

Chromebook case damage \$15 up to replacement cost

First Broken Screen (Each School Year): No Charge

Additional Broken Screens: \$70

Unclean Chromebook & Case subject to up to \$10 charge

12. Parent/Guardian Expectations

- While the AASD provides Internet content filtering, *there is no substitute for parental/guardian supervision when using a computer.*
- Monitor student use of the Chromebook and Internet at home.
- Ensure that your child understands and adheres to the Chromebook and network policies as set forth in this handbook.
- The parent/guardian will reimburse the school district for any costs incurred or fines assessed due to misuse, neglect, damage, or loss, including theft, up to the full replacement cost of the device.
- Review the Appleton Area School District's policies named herein and this Chromebook Handbook with your child.
- Assist your child who is assigned the device with homework and school assignments. The purpose of the 1:1 Initiative is to help students learn. Student use of the Chromebook for learning is the most important priority of the 1:1 Initiative.
- Ensure the return of the Chromebook and all accessories at the end of the school year or before the student withdraws from school.

13. Student owned devices/BYOD

Student owned devices will be allowed for instructional use. The AASD is not liable for damage, loss, theft, or IT issues of student owned devices. Students who choose to bring their own personal devices do not rescind the District's right to inspect the device at any time while on school property. The AASD does not guarantee support for download tools to personally owned devices, including links, applications, and extensions.

14. Rights and ownership information

The AASD holds the legal title to the Chromebook and all accessories. Right of possession and use are limited to and conditioned upon full and complete compliance with all AASD Board Policies and procedures, including but not limited to 363, 443.5, 492, 443.92, and other guidelines outlined in this handbook. The AASD does not guarantee that its technology resources will be uninterrupted or error free. Access to the network is provided on an "as is" basis without warranties of any kind. In the rare event that the network is down, neither the AASD nor any of its agents or employees will be responsible for lost or missing data.
